MAGNEPAN

Model MG-1.7

After a 12-year history, reaching a near-iconic standing, the Magneplanar 1.6 has been improved with value engineering. No costly tweaks of questionable sonic value. Magnepan is all about better ideas which give high-value sonic improvements that can be verified in blind-fold testing.

The 1.7 is a departure from Magnepan's 41-year history of using planar magnetic drivers for the bass or lower midrange. The use of quasi ribbon technology down into the lower midrange and bass will provide a new level of coherence.

What is a quasi-ribbon? The quasi ribbon driver is a deviation from the true ribbon design. A very thin film backing is used to hold the delicate ribbons in place. One of the advantages of quasi ribbon drivers is extremely wide frequency band width and high power handling. The result in the 1.7 is low distortion and seamless ribbon clarity--a sound so clear and effortless that it has changed the thinking of thousands of audiophiles about planar speakers.

The 1.7 also boasts a quasi ribbon super tweeter with a wider "sweet spot," and one step closer to the delicacy and detail of Magnepan's true ribbon design.

A new, modern styling with wrap-around aluminum trim on the 1.7 is also a departure from Magnepan's more conservative cosmetic styling. The standard wood trims of the 1.6 (as shown below) are available upon special order and an upcharge. Aluminum trim is available in silver or black or primer coat for custom finishing. Wood trim is available in natural oak, black oak or dark cherry. Fabric choices are off-white, black or dark gray.

The total design concept for the Magneplanar 1.7 results in a speaker that measures exceptionally well by all the standard criteria, but more important, sounds even better.

The 1.7 is handcrafted in the USA and made with virtually all American-made parts. The suggested retail price starts at \$1,995 pair. There will be a modest price increase for trim and fabric upgrade options.

Colors Available:

"Basic"
Trim-Black
Cloth-Black Knit

Trim-Aluminium~Black or Silver
Cloth-Classic off-white, black or dark gray

Trim-Natural oak, black or cherry
Cloth-Classic off-white, black or dark gray

Magneplanar 1.7

- 3-Way, Full Range, Quasi-Ribbon
- Bass radiating area: 442 Sq. In.
- Quasi-Ribbon Tweeter/Super Tweeter Size: 2" x 48"
- Frequency Response: 40Hz-22KHz +/- 3dB
- Sensitivity: 86dB, 500Hz/1 meter/2.83V
- Impedance: Nominal 4-Ohms
- Power Rating: See FAQ on website
- Dimensions: 19-1/4" x 64-1/2" x 2"
- Shipping Weight: 95 lbs.
- Warranty: LIMITED/3 year/Original Owner
