

▲ **Good morning**—wake up to a gently lighted home.

▲ **Sunset**—as the sun goes down, landscape lighting accents the beauty of your home.

▲ **Good night**—while you sleep, overnight lighting keeps you safe and secure.

The RadioRA Chronos system allows you to control all the lighting in your home with the combined benefits of large-button master controls and automatic timeclock events.

- Light up your home from the safety of your car
- Enter your home and adjust the lights with your master control
- Reduce wall clutter by replacing multiple switches on the wall with a single master control
- Secure your home for the night...control and monitor all the lighting from your bedside
- Enjoy a worry-free holiday with away mode programming that gives your home a lived-in look
- Integrate with advanced RS232 touchscreens or computer-based systems
- Connects easily with security systems

Chronos controller provides 64 zones of lighting control for your RadioRA system

RadioRA® | Chronos™ package options

Option 1 (RALB-CHR-W-)

- (3) 5-large-button wall-mounted master controls** (with personalized engraving) control and monitor status of RadioRA dimmers and switches anywhere in your home

- (2) car visor controls** control your system's lights and garage door right from your car

- (1) entry master control** multi-function entry control for security and garage door control

- (7) 600W dimmers** replace existing dimmers or switches to control individual lights in each room

- (3) accessory dimmers** provides multi-location dimming

- (3) 1000W dimmers** replace existing dimmers or switches to control individual lights in each room

- (1) Chronos timeclock and system bridge** links two complete RadioRA systems providing up to 64 zones of lighting control

Option 2 (RALB-CHR-M-)

Includes all of the same components as Option 1, substituting one tabletop master control in place of one large-button, wall-mounted master control.

- (1) tabletop master control** control and monitor status of RadioRA dimmers and switches anywhere in your home

How RadioRA works

RadioRA uses radio-frequency signals to communicate between dimmers and controls. Each system has a unique digital code to ensure the reliability of your system.

RadioRA packages offer turnkey lighting control solutions. The system installs easily with no rewiring, and can be easily expanded at any time.
